

CathPCI

Dashboard NEWS.....

Master List Update:

The CathPCI Registry has updated the v5 Master Devices list, Device ID 4648 Intravascular Lithotripsy (IVL) System has been retired. This device is replaced with Device ID 5062 Shockwave Intravascular Lithotripsy (IVL) System as of 4/1/21 to accommodate capturing the device measurements.

If you are using the ACC's online data collection tool, this update has been applied and no action is required. If you are using a vendor tool, please follow the vendor's instructions for updating the intracoronary device list.

Upcoming Call For Data Deadline Approaching on April 15th, 2021:

To ensure a successful Call for Data Deadline occurring on April 15th, 2021 at 11:59:59 PM EST, NCDR participants are encouraged to submit Q4 2020 (patients discharged between Oct 1st, 2020 and Dec 31st 2020) data early, and obtain a green/passing status. If your facility has no eligible patients for submission during this quarter, please proceed in submitting the quarter to confirm a zero patient quarter.

We appreciate your patience while we process all incoming questions on a first-in-first-out basis, answering all questions in the order received and remind participants to avoid resubmitting questions which may not be answered yet. When submitting a question, please ensure the title reflects the registry of interest as well as the topic at hand.

CathPCI Registry NEWS:

Coming soon! Registry participants* will receive a Percutaneous Coronary Intervention (PCI) Cost of Care Report. *Reports may be unavailable for select participants (i.e. did not have eligible cost data, not part of the registry, etc.)

Save the date! To explain and orient participants to their PCI Cost of Care Report, the FAIR Health Team will host a special webinar on April 14 | 3:00 – 4:00 p.m. ET

Self-Audit Tool for v5:

An important part of ensuring data integrity at your hospital is performing self-assessments on the data coded. This is completed by 2 reviewers who abstract the same record and compare results. Please find the brand new Self Audit Tool v5 on the Documents Home page to help you complete this important work.

CathPCI Registry Seeks Feedback on In-Hospital Risk-Standardized Mortality Model:

As part of ongoing efforts to report meaningful outcomes and improve patient care, the ACC is launching an open comment period for the CathPCI Registry In-Hospital Risk-Standardized Mortality Model. Before completing the survey, please review the risk model methodology. The survey should take about 10 minutes to complete and will close Wednesday, April 21.
