Dashboard NEWS…..

NCDR Data Quality Program Update

The NCDR kicked off the ICD Registry 2021 audit for of 2020 data ICD Registry a few weeks ago. Facilities randomly selected for audit will received an email addressed to the Registry Site Manager and Medical Director with all instructions for accessing information necessary for the audit. Please check your spam and junk mail folders to ensure the audit notification is received. Any sites that do not receive an email or find an audit notification in the dashboard's file delivery have not been selected for this year's audit cycle.

Metric Information (v2.3):

Work is in progress to incorporate new v2.3 elements into existing metrics where applicable. The new version launched April 1, 2021 and the goal is to have any existing metric updates complete prior to the 2021Q2 call for data on September 30, 2021. All changes incorporating new elements will be effective beginning 2021Q2.

- Appropriate Use Criteria are now being included in the weekly aggregation for 2021Q2
- Metric 4 and 14 (Discharge Medication metrics) are being updated to include ARNI and completion anticipated in July 2021.
- Metric 25 and 27 (Guideline metrics) are being updated to account for movement of Anticipated Requirement of >40% RV pacing under a different sequence number and completion anticipated in August 2021.

Please continue to monitor the Announcement page on NCDR for updates. Thank you for your patience while work is in progress to get these updates into the weekly aggregation of 2021Q2 metrics.
