

Chest Pain MI

Dashboard NEWS....

UPDATE on Voluntary Public Reporting Program

The Public Reporting star scores for the Chest Pain – MI Registry have been updated to reflect 2019 performance data. As you may recall this report was first generated in November 2020; however, an issue was identified that affected sites submitting the FDS or BDS – STEMI/NSTEMI (with or without sampling) and FDS or BDS – All patients (sampling) patient populations. This has been corrected! See your 2019 performance data and star scores on the private Hospital Public Reporting dashboard page, accessible from the dashboard “hamburger” menu.

Sites who submit FDS or BDS – All patients (without sampling) had a valid report in November and this is unchanged.

Quality Summit 2021 Workgroup

It may seem early but it’s time to begin planning for the 2021 Quality Summit! The Chest Pain – MI Registry Quality Summit workgroup is looking for 3 individuals who can join us for a 1 hour brainstorming session and are able to response to follow-up emails. If you are willing to share your time, perspective and expertise, please email us at ncdr@acc.org attn: Quality Summit CPMI Registry. Be sure to include your name, organization and we would love to know your role and how it intersects with the registry. Thank you and we look forward to hearing from you.
