## Dashboard NEWS.....

### **Save the Date!**

A special webinar hosted by our MedAxiom colleague Ginger Biesbrock, PA-C, MPH, MPAS, FACC, titled: Understanding Total Cost of Care – Definitions, Organization Responsibility and Preparing for the Future will take place June 7 | 2:00 – 3:00 p.m. ET. We invite you to ‘save the date’ and join this session to enhance your understanding of the difference between the cost to an organization for delivery of healthcare vs the cost to payer and patient for receiving the care. Ginger will also review value-based reimbursement models and discuss why total cost of care is important and how healthcare organizations are being measured on total cost of care.

### **Support for the PCI Cost of Care Report**

If you need additional information to help convert the Text Files to Excel, download these step-by-step instructions. If you’re perplexed about why your facility does not have PCI cost data, review this information and illustrative graphics.

If you have questions about how the report was developed, the FAIR Health Team reviewed the study methodology during a special webinar. A PDF of their slides are available as well a recording of the here.

### **NEWS - A New Offering is now available for the ACC’s CathPCI Registry Participants!**

We are pleased to share the American College of Cardiology (ACC) in collaboration with FAIR Health, a nonprofit that maintains a private claims repository, have collaborated to provide CathPCI Registry participants a Percutaneous Coronary Intervention (PCI) Cost of Care Study Report. Please find the report artifacts on your private File Delivery page (available from the “hamburger” menu on the Dashboard).

There are 7 documents associated with the report:

1. Your facility’s PCI Cost of Care Study report
2. The FAIR Health data dictionary
3. A guide to help you import data files to Excel
4. Place of Service data
5. Risk Score Group data
6. Total Cost of Care Benchmark data
7. Total Cost of Care by facility NPI data

### **Lightbulb!**

**Q:** How long does it take a nurse to change a light bulb?

**A:** About 15 seconds tops to change it and 20 minutes to document it – how, when, where, why, and what serial number it had.
