[2021Q2 Base and 30 Day Follow Up and 2020Q1 One Year Follow Up R4Q US Registry Benchmarks are Published!](#)

The 2021Q2 Base and 30 Day Follow Up and 2020Q1 One Year Follow Up registry benchmarks for Executive Summary Measures and Metrics (and your hospital performance, if a green DQR submission status was achieved) are available on the eReports Dashboard. These R4Q data are considered published.

Metric 336. TAVR 30-day risk standardized mortality/morbidity composite and detail lines available under the "TAVR 30-day composite risk model (R3Y)" category for the 2021Q2 ending timeframe remains under analysis. Once completed, an announcement will be posted to alert sites it has been published

[MedAxiom HeartTalk: Structural Heart Innovations – TVT and Shared Decision-Making](#)

TVT is always evolving and is one of the most exciting areas of innovation in our industry. On MedAxiom HeartTalk, host Melanie Lawson talks with experts Vinod Thourani, MD, and John Carroll, MD, about how TVT innovations are impacting the way they deliver care and why tracking data collaboratively is crucial to future advancements. Plus, Ginger Biesbrock, MedAxiom's EVP of Care Transformation, explains the importance of shared decision-making for TVT procedures and what it could mean for low-risk patients. Stay tuned to MedAxiom HeartTalk for additional episodes in the new Structural Heart Innovations series! [LISTEN TO PODCAST](#)

[v2.1 Data Collection Tool access has been restored](#)

NCDR would like to share that the v2.1 Data Collection Tool has been restored. The final sunset of the v2.1 Data Collection Tool will occur with the 2022Q1 Data Deadline in late July of 2022. After the scheduled sunset, the v2.1 DCT will no longer be available for any new information, updates, or amendments.
