[EP Device Implant Registry Voluntary Public Reporting Program: Preview 2020 Performance Data](#)

The Public Reporting star scores for the EP Device Implant Registry have been updated to reflect 2020 performance data. Registry participants have the opportunity to review these scores before they are publicly available. Log into the NCDR, navigate to the EP Device Implant Registry Dashboard and select Hospital Public Reporting from the left upper hamburger menu to review your facility's performance. Star scores for organizations that have opted in, or that opt in now, will be publicly available on ACC's FInd Your Heart a Home tool after Oct. 25. By default, facilities that have not opted in will be shown as "not participating" in Public Reporting. If you are interested in publicly reporting your EP Device Implant Registry performance data, click here to learn more and download a data release consent form. For specific questions, please email ncdr@acc.org.

[New FAQs Posted to the v2.3 FAQ Database](#)

Please review the new FAQs:

FAQ #25369 – Seq. 10205 (Discharge Medication Prescribed)

FAQ #25370 – Seq. 14725 (Prior Aortic Valve Procedure Date)

[Updated Metric Information for Version 2.3](#)

Guideline Metrics 25, 26, and 27 are now updated to include changes resulting from Version 2.3

We are pleased to share the selection of "Anticipated Requirement of >40% RV pacing" under the v2.3 element "Reason Pacing Indicated" (Seq. # 14731) is now incorporated in the Guidelines Metrics 25 and 27.

AND

The v2.3 element "Ventricular Fibrillation" (Seq. # 14719) is now incorporated in the Guideline Metrics 25 and 26.

Please review the updated metrics on the eReports dashboard on Monday September 20th after the weekly aggregation is complete. The update to the Device Based Therapy Guideline Metrics provides two weekly data aggregations for metric review prior to the September 30th call for data deadline.
